LS School Spirit: Mismatch Day!

Last Friday was another QISS Lower School Spirit Day sponsored by the Lower School Student Council. Students and teachers had a ton of fun celebrating Mismatch Day! There were mixed up shoes, socks, pants, shirts, ties, and hair! It was a great way for everyone to have fun together at school!

Hello Grade 2 Parents!

The class is having a great time learning about more forms of extreme weather. In addition to blizzards, the students have studied earthquakes, landslides, tsunamis, and volcanoes! Grade 2 has been doing an incredible job learning about these powerful events, especially with the questions they have been asking. The students are doing their part as they truly lead our unit of inquiry into these amazing natural phenomena.

In Math class the students have continued to work with charts and graphs. Everyone took a survey of their family members' favorite flavor of ice cream, and the class put the data together in a tally mark chart. Then each student made a bar graph to display our data. The students also took a survey of the entire Lower School to find the most popular type of weather at QISS. Grade 2 has continued to utilize technology by testing their math skills with IXL in our IT lab. The students are able to practice reading charts and graphs, and today they interpreted data to create missing parts of bar graphs and pictographs.
